

How to create an HTML tab for your Facebook Page

Step 1

1. Get the Static FBML app.
2. Go to <http://www.facebook.com/apps/application.php?id=4949752878>
3. Click on Add to My Page

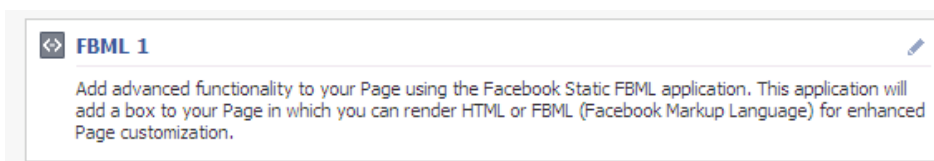

4. Choose the Page you wish to add the tab.

Click Close.

Step 2

1. Go to the Page you added the Static FBML app.
2. Click on Edit Page.
3. Scroll down until you find the FBML 1 app in the list.

Note: the tiny pencil to the right is your Edit Menu for this app.

4. Click the Edit Pencil for FBML 1.
 - a. Select Application Settings.
 - i. Choose Remove box.
 - ii. Choose Add tab.
 - iii. Click ok.
 - b. Select Edit.
5. Change the Box Title to something short & sweet.
6. Enter your HTML code into the blank box.
7. Click Save Changes.

Your HTML should now appear as a tab on your Page. Not all kinds of HTML/JavaScript will work. See the rules on the Static FBML app for details.

To create another box, edit your current box. Click add another box at the bottom of the screen.
